Chromatographia Vol 29, Subject Index

a-Amino acids, retention data for, 450
Active carbon, for solution decontamination, 167
Adsorbent-adsorbate interaction, 228
Adsorption, hydrophobic, 551
Adsorption, of organics, 228
Adsorption, thermodynamics of, 228
Affinity chromatography, see AC
Aflatoxins in maize, 177
Aflatoxins, extraction of, 435
Alkylnaphthalenes, separation of, 366
Amino acid enantiomers, 51
Amino-layers, in TLC, 467
Analysis of cocoa extracts, 557
Analysis, multi-dimensional, 39
Annular denuder, 151
Apple extracts, 155
Azidothymidine, impurities in, 562

Benzene emission, 603
Bonded phases, characterisation of, 233
Bonded phases, effect of silica pretreatment, 473

Capacity factors, of complexes, 144
Capillaries, quartz, end closure of, 182
Capillaries, quartz, static coating of, 182
Capillaries, thermal desorption from, 523
Capillaries, uncoated, for concentration, 523
Carbohydrates, continuous separation of, 161
Carbon monoxide, conversion to methane, 347
Carbon monoxide, quantitation of, 347
Carboxylic acids in beverages, 54
Carotenoids, end groups of, 363
Carotenoids, spray reagent for, 363
CFC's, 13
Charged compounds in biological samples, 217
Chiral liquid chromatography, book review, 399
Chiral selector, for *a*-amino acids, 449
Chiral separation, 125
Chiral separations, selectivity in, 587
Chiral stationary phase, synthesis of, 170
Chromatography of pharmaceuticals, book review, 502
Chromatography, counter current, 161
Chromatography, general theory of, 248
Chromatography, optimisation of , 446
Column efficiency, 453
Columns, packed and capillary, in SFC, 453
Complexing, outer sphere, 495
Computerised chromatography, book review, 291
Copolymers, characterisation of, 325
Cremer, Erika, 413
Cubic spline interpolation, 269
Cubic spline model, 429

Data handling, book review, 399
Densitometry, TLC, 44
Derivatisation, *in situ*, 467
Derivatisation, post-column, 333
Derivatisation, pre-column, 144
Derivatisation, with m-toluoyl chloride, 151
Derivatisation, with o-phthaldialdehyde/2-mercaptoethanol, 155
Detection, densitometric, 243
Detection, diode array T/MS, 120
Detection, electrochemical, 333
Detection, fluorescence, 155
Detection, fluorimetric, 467
Detection, FPD, 115
Detection, indirect electrochemical, 139
Detection, indirect photometric, 131
Detection, indirect photometric, 139
Detection, isotope effect in, 547
Detection, pulsed amperometric, 7
Detection, reactor, UV, 21
Detector, diode array, 24
Detector, ECD, 547
Detector, electrochemical, 24, 51
Detector, evaporative light scattering, 517
Detector, fluorescence, 24
1,4-Dioxane, in surfactants, 441
Direct injection analysis, 223
Dorsey, John S., 503
Drugs in serum, 223

Elm, taxonomy of, 16
Elution, colloidal, of polymers, 205
Enrichment extraction, 24
Erythromycin, 31
Ethidium bromide, removal from water, 167
Extraction disks,membrane, 415
Extraction, C_{18} column, 31

Film curvature, 606
Flavour compounds, enantiomeric, 125
Flow restrictor, ceramic, 69
Fluorescence enhancement, 243
Fluoride, trifluorosilane derivative, 544
Fluorine in milk, 544
Formaldehyde, lutidine derivative of, 21

γ-Lactones, 125
Gas chromatography, see GC
Gas chromatography/mass spectrometry, see GC-MS
Gaussian peaks, exponentially modified, 248
GC capillaries, series-coupled, 115
GC, adsorption studies with, 35
GC, capillary, adsorption effects in, 575
GC, capillary, film thickness, 606
GC, capillary, injector design, 385
GC, headspace, of fluoride, 544
GC, inverse, 35
GC, of alkanes and alcohols, 576
GC, of alkanes and alkenes, 35
GC, of alkylbenzenes, 375
GC, of alkylnaphthalene fractions, 366
GC, of aqueous organics, 523
GC, of car emissions, 603
GC, of carbon monoxide, 347
GC, of chlorofluorocarbons in aerosols, 13
GC, of epoxides, 322
GC, of halocarbons, 571
GC, of pesticides, 459
GC, on active carbon cloth, 228
GC, optimisation of, 537
GC, retention in, 575
GC-MS, 39
GC-MS, of 1,4-dioxane, 441
GC-MS, of chlorofluorocarbons, 13
Gradient elution, binary, 482

Halocarbons in air, 571
Headspace analysis, of 1,4-dioxane, 441
Headspace sampling, 544
Herbicides, bentazone, 24
Herbicides, phenoxy acid, 24
High-performance liquid chromatography, see LC
High-performance thin-layer chromatography, see TLC
HPLC, see LC
HPTLC, see TLC
Human serum albumin on silica, 170

IC, of alkali metals, 131
IEC, 131
IEC, of alkali metals and NH_4^+, 139
IEC, of carbohydrates, 7
IEC, of cocoa beans, 557
IEC, of lanthanides, 579
IEC, of proteins, 351
IEC, of saccharides, 7
Information theory, 446
Injection, stop-flow, 385
Injector, glass insert for, 385
Ion-chromatography, see IC
Ion-exchange chromatography, see IEC
Ion-pairing modifiers, effect of, 144
Ion-pairing, 395
Isotope dilution, 441
Isotope effect, on ECD, 547

Josamycin, 31

Kalman filter, 269
Kalman filter, 446

L-Porretine as chiral selector, 449
Lanthanides, lactate complexes of, 579
LC of biopolymers, book review, 95
LC, chiral separations, 170
LC, column switching system, 366
LC, molecular interactions in, 583
LC, of *a*-amino acids, 449
LC, of acceptor-donor complexes, 419
LC, of Al(III) and Cr(III), 269
LC, of aliphatic amines in air, 151
LC, of alkyl aryl ketones, 473
LC, of alkylbenzenes, 473
LC, of alkylnaphthalenes, 366
LC, of amino acid derivatives, 482
LC, of amino acids, 155
LC, of amino acids, 51
LC, of aminobenzoic acid isomers, 495
LC, of aniline derivatives, 593
LC, of antipyretics, 446
LC, of aromatic hydrocarbons, 597
LC, of aromatics, 419
LC, of aromatics, 551
LC, of azidothymidine, 44
LC, of azidothymidine, 562
LC, of carboxylic acids, 54
LC, of ceralure and related isomers, 135
LC, of chalcones, 259
LC, of Co, Cu, Fe and Pd, 144
LC, of drugs, 223
LC, of flavonoids, 355
LC, of food preservatives, 76
LC, of formaldehyde in textiles, 21
LC, of fruit juices, 51
LC, of herbicides, 24
LC, of indole derivatives, 495
LC, of lanthanides, 579
LC, of macrolide antibiotics, 31
LC, of mycotoxins, 333
LC, of organic acids, 265
LC, of PAH and nitro-PAH, 489
LC, of pesticides and herbicides, 415
LC, of pesticides, 120
LC, of phenols, 597
LC, of polystyrenes, 205, 313
LC, of propanolol enantiomers, 587
LC, of steroids, 338
LC, of styrene-acrylonitrile copolymers, 325
LC, of trace metals, 254
LC, of trimedlure, 135
LC, of tripeptides, 395
LC, on alumina, 593
LC, on bonded phases, 233, 259
LC, on bonded toluene polymer, 597
LC, on crown ether complexes, 76
LC, on ovomucoid-bonded silica, 587
LC, optimisation of, 265
LC, optimisation of, 482
LC, precipitation, 205, 325
LC, preparative, 135
LC, preparative, 366
LC, retention in, 59
LC, retention mechanism in, 583
LC, retention mechanism in, 90
LC, retention model for, 389
LC, selectivity in, 59
LC, solvent optimisation for, 79
LC, test of reversed phases, 59
LC, with aqueous mobile phases, 275
LC-AAS, on-line coupling, 254
LC-GC, coupled, 125
LC-SEC coupling, 530
Ligand-exchange chromatography, 495
Ligand-exchange, 449
Liquid chromatography, see LC
Luminescence applications, book review, 185

Maize, extraction of aflatoxins from, 435
Membrane extraction disks, 415
Microtrap, for capillary GC, 571
Mobile liquid phase, 482
Mobile phase optimisation, 338
Mobile phase, phenylaniline solution, 131
Mobile phase, quaternary ammonium salts, 144
Mobile phase, vanadium salts, 139
Mobile phases, binary aqueous, 275
Mobile phases, ternary for LC, 389
Multidimensional chromatography, book review, 611
Multiresidue method, 459

Nebulisation, high-pressure, 254

Organic acids, alcohols, sugars, 557
Organic waste analysis, 7
Organics in aqueous samples, 415
Organics, in aqueous solution, 523
Organics, volatile, concentration of, 523

Paper chromatography, see PC
Peak formation, 248
Peak widths, computation of, 537
Peaks, overlapping, deconvolution of, 269
Pelick, Nicholas, 503
Pesticides in fruit, 459
Pesticides, extraction of, 459
Pesticides, in water, 120
Pesticides, photodegradation of, 120
Phenoxy acid herbicides, 24
Phenylaniline, aqueous, eluent, 131
Physics of solvation, book review, 292
Polar tree taxonomy, 355
Polyaromatic hydrocarbons, see PAH

Polyethylene in surfactants, 530
Polymer analysis, 205
Polymer analysis, 517
Polystyrenes, LC of, 313
Porous glass, modified for LC, 233
Porous silica, modified for LC, 233
Porous supports, comparison of, 233
Pretorius, Victor, 203
Propanolol esters, 587
Propidium bromide, removal from water, 167
Protein sequence analysis, book review, 185
Proteins in mouse ascites fluid, 351

Quenching effect, quantification of, 115

Retention and negentropy, 90
Retention behaviour, of polystyrene homopolymers, 313
Retention correlation, 419
Retention data, 279
Retention data, for alkyl benzenes, 375
Retention in LC, model for, 389
Retention index, see RI
Retention, in LC, 59
Retention, modelling for, 79
Retention, of carboxylic acids, 56
Retention-structure relationship, 375
Reversed phases, comparison of, 59
Reversed phases, stability of, 473
RI, in programmed temperature GC, 429
RI, in temperature-programmed GC, 39
RI, Kováts, 375
RI, of alcohols, 533
RI, of aniline derivatives, 593
RI, of epoxides, 322
RI, of esters, 429
RI, of n-alkanes and n-alcohols, 576
RI, of n-hydrocarbons, 429

Sakodynskii, K.I., 201
SEC, of mushroom proteins, 214
SEC, of polyethylene glycols, 530
SEC, of polymers, 517
SEC, of proteins, 351
Selectivity tuning, 115
Selectivity, enhanced, 419
SFC, capillary, model for, 69
SFC, flow programming in, 69
SFC, linear programming in, 69
SFC, of amides, 453
SFC, of involatiles, 453
Side chain liquid crystal polymers, book review, 291
Silica, acid treatment of 473
Silica, anthryl-modified, 489
Silica, crystalline and amorphous, 35
Silica, Cu(II)-loaded, 495
Silica, cyclam-bonded, 495
Silica, mixed function, 223
Size-exclusion chromatography, see SEC
Soil analysis, 7
Solute hydrophobicity, 275
Solute-solvent interaction, 551
Split injector, design for, 385
Stationary phase, phenyl-bonded, 177
Stationary phases, comparison of, 259
Stationary phases, non-porous, 205
Stationary phases, stability of, 66
Statistical iteration technique, 537
Steroids, impurities in, 338
Styrene-acrylonitrile copolymers, 517
Sulphur compounds, GC of, 115
Supercritical fluid chromatography, see SFC

Taxonomy, fingerprinting in, 355
Thermal generation of aromas, book review, 400
Thin-layer chromatography, book review, 502
Thin-layer chromatography, see TLC
Thymine, 44
TLC, densitometry, 562
TLC, instrumental, book review, 95
TLC, of aflatoxins, 177
TLC, of aflatoxins, 435
TLC, of azidothymidine, 44
TLC, of azidothymidine, 562
TLC, of carbohydrates, 467
TLC, of carotenoids, 363
TLC, of flavonoid glycosides, 16
TLC, of SBD-glutathione, 243
TLC, two dimensional, 16
TLC, two-dimensional, 177
TLC, two-dimensional, 435
Trace enrichment, on-line, 415
Tripeptides, diastereomeric, 395
Tripeptides, effect of pH on separation, 395

Valve for chromatography coupling, 217
van Deemter plots, 453

Zone electrophoresis-LC, coupled on-line, 217

Chromatographia Vol 29, Key Word Index

a-Amino-acids, 449
Acceptor-Donor complexes, 419
Acid pretreatment of silica, 473
Activated carbon cloth, 228
Activated charcoal filters, 167
Adsorption chromatography of SAN copolymers, 325
Adsorption effects, 575
Adsorption of organic compounds, 228
Aerosol cans, 13
Aflatoxin in maize, 177
Aflatoxin, 435
Airborne halocarbons, 571
Al(III) and Cr(III), 269
Aliphatic amines in air, 151
Alkali metals, 131
Alkanes and alkenes, 35
Alkanes, 243

Chlorofluorocarbons, 13
Chromatography, general, 446
CLC, 7, 21, 24, 31, 44, 51, 54, 59, 79, 120, 131, 135, 144, 151, 155, 170, 217, 223, 233, 251, 254, 259, 265, 269, 275, 313, 333, 338, 351, 355, 366, 389, 395, 415, 419, 449, 473, 482, 530, 551, 557, 562, 579, 583, 587, 593, 597
Cocoa beans, 557
Collodial elution, 205
Column coupling and column switching, 366
Columnn liquid chromatography, see CLC
Column liquid chromatography - gas chromatography, 125
Computer-based global optimization of multivariates, 537
Concentration, 523
Copper, cobalt, iron and palladium, 144
Counter-current chromatography, 161
Crown ethers, 76
Crystalline and amorphous silicas, 35
Crystalline regions, 473
Cubic spline interpolation, 269
Cubic spline model, 429
Cyclodextrins, 243

Diaromatic hydrocarbons, 366
Diasteromeric peptides, 395
Diode array T/mass spectrometry detection, 120
Diode array, electrochemical and fluorescence detectors, 24
1,4-dioxane, 441
Direct serum injection, 223
Discriminant analysis, 16
Displacement model, 275
Drug analysis, 223
Dynamic ion-exchange, 579

Effects of crystal structure, 35
Effects of structure and coverage density, 233
Ehrlich ascites fluid proteins, 351
Electrochemical detection, 51, 333
Electron capture detector, 547
Elm tree taxonomy, 16
Elution conditions, 205
Erythromycin, 31
Ethidium bromide, 167
Evaporative light scattering detector, 517
Experimental design, 259
Exponentially modified Gaussian peaks, 248
Extraction cartridges, 31
Extraction, 435

Factor analysis, 259
Fingerprinting, 355
Flavonoid glycosides, 16
Flavonoids, 355
Fluorescence detection, 467
Fluorescence enhancement, 243
Fluoride in milk, 544
Formaldehyde, 21
FPD-detection, 115
Fruit flavours, 125

Fruit juices, 51, 54
Fruit samples, 459

γ- lactones, 125
Gamma peaks, 248
Gas chromatography, see GC
Gas chromatography/mass spectrometry, see GC/MS
Gas-solid chromatography, 35, 228
Gasohol, 603
GC analysis of fractions, 366
GC, 13, 39, 115, 322, 347, 375, 385, 429, 459, 537, 544, 571, 575, 603
GC/MS, 39, 441
Gel permeation chromatography, 214
General chromatographic theory, 248
Ginkgo biloba L., 251
Ginkgolides, 251
Glass capillary columns, 575
Glass inserts, 385
Glutathione-SBD, 243

Headspace analysis, 441
Headspace sampling, 544
High-performance precipitation liquid chromatography, 205
High-performance precipitation chromatography, 325
Human serum albumin on silica, 170
Hydraulic high pressure nebulization, 254
Hydrophobic adsorption, 551
Hydrophobic parameter, 275

Impurities in steroid drugs, 338
Impurities of azidothymidine, 562
In-situ generation of standards, 347
Indirect photometric and electrochemical detection, 139
Indirect photometric detection, 131
Indole derivatives, 495
Information theory, 446
Intermolecular interactions, 583
Ion chromatography, 131
Ion exchange chromatography, 139
Ion-pair modifier, 144
Ionizable solutes, 76
Isocratic and gradient elution, 313
Isotope effects, 547

Josamycin, 31

Kalman filter, 269, 446
Kováts retention index, 375

Lactate complexes, 579
Leaded fuels, 603
Li^+, Na^+, NH^+_4 and K^+, 139
Ligand exchange, 449
Ligand-exchange chromatography, 495
Linear solvation energy relationship (LSER), 551
Liquid chromatography, 90

m-Toluoyl derivatives, 151
Maize, 435
Mass spectrometry, 13
Membrane extraction disks, 415
Metal-loaded silica, 495
Micro-trap, 571
Mixed-functional silica, 223
Mobile phase optimization, 338
Modified statistical iteration technique, 537
Monosaccharides, 7
Moving-column system, 161
Multiresidue methods, 459

Mushroom proteins, 205
